

Their PTO Shouldn't Be Your Overtime

Some things in life should be easy, including entering and tracking PTO hours. That's precisely what Vfficient from VensureHR does for today's business owners—and a lot more.

Designed to streamline virtually all of your human resource tasks, Vfficient is a cloud-based HR management system that helps you manage payroll, training, benefits, recruiting and all other aspects of an employee's lifecycle without the need for costly add-ons.

And with Vfficient, you don't just get technology; you get experts too. Here's how it all works:

Step One

You meet with our team of knowledgeable HR experts, who learn more about you, your business, and your HR management needs. Using the information you provide, they set up your Vfficient account, ensure data is properly transferred, and thoroughly train you on how to use the system.

Step Two

Existing and future employees will have access to a secure, self-service portal for their use. They can log into it anytime from their phone, tablet, or computer to set up direct deposit, enroll in benefits, see paystubs, view and request PTO hours, and even download W-2's and other documents.

Step Three

If you have any questions, VensureHR client service teams and SHRM-certified HR specialists are here to help. You'll talk to real people who know and understand your business needs. You can be confident that you'll always have the full support of our team to rely on.
